

Functional requirements		
ID	Name	Acceptance criteria
1	Create reservation	After creating an account, the user can create a reservation for either 1 or 2 hours by specifying the start date-time of the reservation and the duration. A free tennis court at the desired time will automatically be assigned to the reservation.
2	List reservations	The user will be able to list his existing active reservations, that is reservations with start date-time $\geq$ current date-time, will be shown. The administrator will be able to list all reservations and filter them by the owner's username.
3	Delete reservation	The user will be able to cancel any of his reservations at any time. Administrators can cancel any user's reservation.
4	Update reservation	The user can update his reservation at any time, meaning he can reschedule the reservation. Administrators can reschedule any reservation.
5	Add court	Administrators will be able to add tennis courts to make reservations for.
6	Delete court	Administrators will be able to remove any tennis court. Removing the court will result in canceling all reservations for the given court.
